Data collection is a crucial aspect of every behavior change procedure. From FBA to BIP, data collection is used to track behavioral progress and to modify procedures as necessary. This workshop will explain the different types of data collection, identify which data collection procedure is most appropriate for different types of interfering behaviors, discuss how to effectively collect data in a classroom setting (regardless of class ratio), and provide hands-on interactive practice for collecting data.

Learner Objectives

As a result of this activity, the participant will be able to:

- *identify the different types of data collection.*
- *explain when to use latency, duration, interval, and frequency data.*
- *summarize the advantages of using interval data and distinguish between whole and partial recordings.*

Agenda

4:30 Frequency data
5:15 Duration data
5:45 Break
6:00 Latency data
6:45 Interval data- partial & whole interval
7:30 Hands on Practice
8:00 Session Ends

Important: This is a repeat of the sessions held previously. You are not eligible for CEUs if you attended any of the previous sessions.
